

Augmented Reality

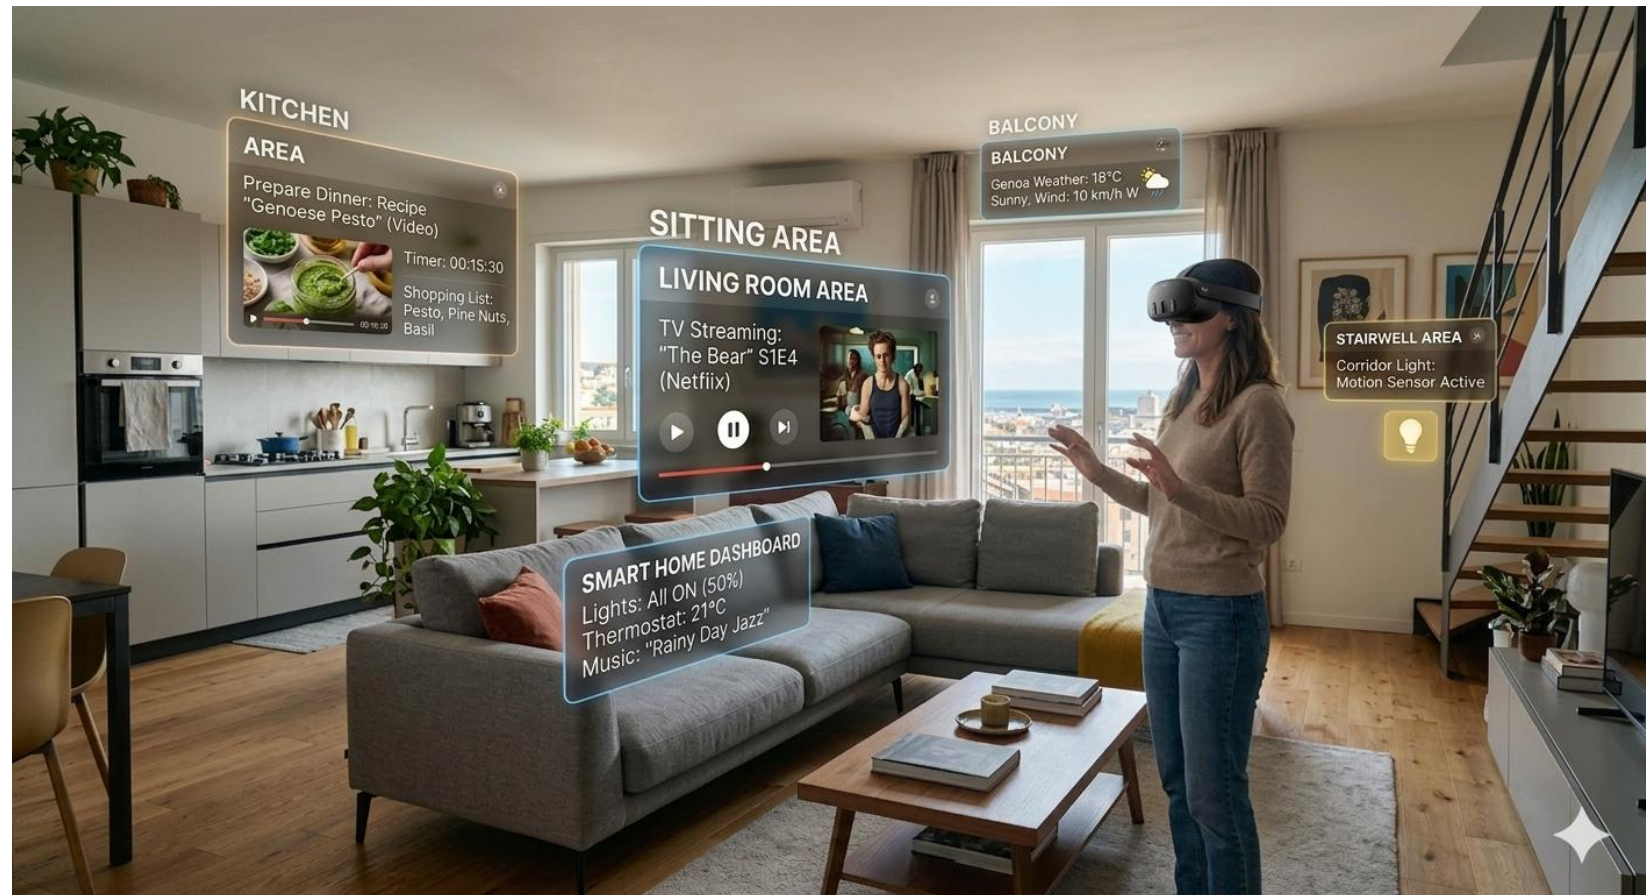

Final Project

Manuela Chessa – manuela.chessa@unige.it

Fabio Solari – fabio.solari@unige.it

The Augmented Life

- Create an application for an Augmented Room/Office/Park/Street
- Detect images, features, objects, planes and augment them with interesting/funny/useful information

The Augmented Museum

Hardware and/or simulation

You can build the application for a smartphone/tablet and test it in real environments

Or

You can use the XR simulation environment, with one of the predefined environments or creating your (e.g. digital twin of an existing environment)

The Augmented Museum

Tests

Test your application with a reasonable number of visual features

Record a video, either in the case of real-world build and/or XR simulation.

The Augmented Museum

Final Report

The Final Report should contain

- Details about the choice of libraries, SDKs and all the design/implementation choices
- A link to a repository with the code (entire cleaned project)
- A video showing the running application (real or simulated)

Exam Rules

1 or 2 person per project

Send the project at least 5 working days before the exam (submit the project before the first one going the exam)

Next exams are (time and rooms TBC):

- Monday 15th June
- Monday 29th June
- Wednesday 15th July
- Thursday 10th September

Exams are an oral evaluation of ALL the topics of the course.
